

ISO 14001:2015

Auditor Transition (Live)

COURSE SYNOPSIS

ISO 14001:2015

Auditor Transition (Live)

Introduction

The course is designed for auditors who have knowledge of ISO 14001:2004 and wish to gain insight on how to interpret and audit the ISO 14001:2015 version of the standard. Each clause of the standard is interpreted, followed by an explanation of an audit approach to the related clause. Particular emphasis is focused on, strategic analysis and the context of the organisation, risk based thinking and business process management.

Course outcomes:

- Audit ISO 14001:2015 requirements.
- Understand the fundamental changes from ISO 14001:2004.
- Appreciate the tools used to establish the context of the organisation.
- Assess risk management techniques, as used to apply risk-based thinking to an environmental management system.
- Understand business process management and the use of the process approach in environmental management systems.

Who should attend:

- Auditors with existing knowledge of ISO 14001 with a need to upgrade their skills and understanding to audit conformance with the requirements of ISO 14001:2015.
- Portfolios with responsibility for business assurance and internal or supplier auditing.

Benefits include:

- Material is developed by environmental auditors with extensive experience in developing, implementing and auditing environmental management systems.
- In-depth understanding of the new standard and how it should be audited.
- Broad view of how conformance may be achieved.
- Examples of tools and templates used for identification of context, environmental aspect, risk and opportunity identification and quantification, action plans and response to requirements for EMS processes.
- Live online presentations, in the format of a webinar, allow for the course to be taken from any location and questions can still be asked on-the-fly.

Information delivered in presentations is supplemented by written notes, pro-forma templates, registers and plans.

Learning modules and assessment is conducted in four segments of approximately 3 hours per day. This duration includes presentation time, participation in exercises and interactive discussions.

A facilitator interacts with the class online to assess teamwork, progress of candidates, and answer questions. The class is also able to collaborate online in a secure environment under the guidance of the facilitator.

The ISO 14001:2015 standard is not provided as part of the courseware and should therefore be obtained from your national standards body or from www.iso.org

Learning is reinforced with exercises and assessments and result in one of two certificates. A 70% aggregate or more will receive a certificate of successful completion. A final aggregate of less than 70% will receive a certificate of attendance.
